Mexico City, Mexico | edher.diaz21@gmail.com | +52 5584698350 | edherivan.com

Professional Summary

Data and Cloud Engineer with BigQuery, PySpark, Google Cloud, and LookML expertise. Proven track record of optimizing data pipelines, improving marketing analytics, and automating workflows to enhance business decision-making. Passionate about data governance, synthetic data generation, and scalable analytics solutions.

Professional Experience

Google Cloud Engineer | GlobalLogic | Aug 2024 - Present

- Led the development of diverse solutions to enhance marketing campaign performance by leveraging Google Cloud tools and integrating Data Transfer processes in BigQuery.
- Developed and implemented a methodology for building and maintaining projects using LookML, Python, and BigQuery, reducing development time by 30%.
- Developed a Python and BigQuery-based methodology to generate synthetic data, enhancing dashboard development and customization while reducing data creation time by 40%.
- Led customer meetings to define key metrics, drill-downs, visualizations, and communication channels for marketing dashboards

Looker Consultant Analyst | GTEC | Dec 2023 - Aug 2024

- Implemented a forecast model for inventory management, reducing overstock by 30%.
- Led data visualization, ingestion, and KPI analysis for business insights using Python, BigQuery, Looker, and DataFlow.
- Developed and maintained data models for predictive analytics and dashboard performance improvements.

Technical Support Specialist (Google Looker) | Infosys | Dec 2021 - Dec 2023

- Resolved 400+ data analytics cases, improving customer satisfaction to an average of 4.5/5.
- Spearheaded data governance policies across multiple Looker instances, ensuring compliance and data quality.
- Designed dashboards and optimized database connections for PostgreSQL, MySQL, and other databases.

Skills

- Programming & Data: Python, SQL, LookML, FastAPI, React, JavaScript
- Data Science & Analytics: Bigquery Pandas, NumPy, Matplotlib, Scikit-learn
- Cloud & Infrastructure: Google Cloud (BigQuery, DataFlow, VertexAI, Cloud Storage)
- Version Control & Tools: Git, Jupyter Notebook, API Development, Looker Studio

Certifications

Associate Cloud Engineer | Google Cloud | 2025

- Established and configured foundational Google Cloud environments, demonstrating proficiency in planning, deployment, and securing a variety of cloud solutions.

Generative AI Leader | Google Cloud | 2025

- Applied business-level knowledge of Google Cloud's Gen AI offerings to identify strategic transformation opportunities and guide innovative, responsible AI adoption.

Data Engineer | DataCamp | 2024

- Proven expertise in SQL and data management, including data cleaning and transformation.
- Assessed through theoretical and practical exams, solving real-world data engineering challenges.

Education

Master in Applied Artificial Intelligence | Tecnologico de Monterrey

- Core Focus: Developing advanced competencies in applied artificial intelligence and emerging technologies to drive technological innovation, transfer technology, and lead strategic organizational transformation.

Diploma in Data Science | Skills Tech, Mexico (2022 - 2023)

- Capstone Project: Conducted an in-depth analysis and prediction of energy prices within the wholesale electricity market of Mexico, demonstrating strong analytical and problem-solving skills.
- Focus on Python, SQL, Data Governance, Kimball Methodology

BSc in Energy Engineering | Universidad Autonoma Metropolitana (2016 - 2021)

- Achievements: Awarded the University Merit Medal in recognition of academic excellence, outstanding performance, and a top-ranking GPA in my graduating class.
