PROFESSIONAL SUMMARY

Analytics Engineer with 4+ years designing Looker and BigQuery solutions on Google Cloud. Google Cloud Certified Associate Cloud Engineer and lead author of AI agent skills and Looker blocks published in Google's looker-open-source organization. Cut LookML development time 30% by automating code generation with LLM agents and reduced a client's overstock 30% with a forecast model. Specialized in LookML semantic modeling, data pipelines, and synthetic data generation.

SKILLS

BI & Analytics: Looker, LookML, Looker Studio, semantic and dimensional modeling (Kimball), dashboard design

Data & Cloud: BigQuery, SQL, Python, Dataflow, PySpark, Vertex AI, Cloud Storage

Data Science: pandas, NumPy, scikit-learn, Matplotlib, forecasting, BigQuery ML

AI & Tooling: LLM agents (Gemini, Claude Code, Codex, Cursor), prompt engineering, Git, Jupyter, FastAPI

Languages: Spanish (native), English (professional)

PROFESSIONAL EXPERIENCE

Google Cloud Engineer | GlobalLogic

Aug 2024 – Present

- Engineered LLM-agent integrations and prompt frameworks (Gemini, Claude Code, Codex, Cursor) that generate and refactor LookML automatically, accelerating dashboard delivery.
- Designed a LookML/Python/BigQuery methodology adopted across projects, cutting development time 30%.
- Built a Python/BigQuery synthetic data generator for dashboard builds and demos, cutting data creation time 40%.
- Led client workshops to define KPIs, drill-downs, and visualizations for marketing dashboards shipped to production.

Looker Consultant | GTEC

Dec 2023 – Aug 2024

- Implemented an inventory forecast model that reduced overstock by 30%.
- Owned data ingestion, visualization, and KPI analysis with Python, BigQuery, Dataflow, and Looker.
- Developed and maintained data models for predictive analytics, improving dashboard performance.

Technical Support Specialist, Google Looker | Infosys

Dec 2021 – Dec 2023

- Resolved 400+ data analytics cases for Looker customers, raising average customer satisfaction to 4.5/5.
- Implemented data governance policies across multiple Looker instances, ensuring compliance and data quality.
- Designed customer dashboards and optimized Looker connections to PostgreSQL, MySQL, and other databases.

OPEN SOURCE & PROJECTS

Contributor to Google's *looker-open-source* organization: 30+ Looker blocks and 45 merged pull requests.

- Looker Architect (lead author):** AI agent skill that designs and scaffolds clean, well-structured LookML projects.
- Looker Performance Optimizer (lead author):** AI agent skill that generates and refactors LookML for performance.
- Agent Analytics Block (lead author):** Looker block to monitor and optimize GenAI agents on BigQuery Agent Analytics.
- GA Four Block:** GA4 block with incremental sessionization, BigQuery ML propensity models, and cohort dashboards.

EDUCATION

MSc in Applied Artificial Intelligence | Tecnológico de Monterrey

In progress

Diploma in Data Science | Skills Tech, Mexico

2022 – 2023

- Capstone: electricity price forecasting for Mexico's wholesale market with Python and SQL; Kimball methodology.

BSc in Energy Engineering | Universidad Autónoma Metropolitana

2016 – 2021

- University Merit Medal for the top GPA of the graduating class.

CERTIFICATIONS

Associate Cloud Engineer | Google Cloud

2026

Generative AI Leader | Google Cloud

2025

Data Engineer | DataCamp

2025
